

TW-524 WLAN + PLA

TW-PLA524 supports transfer rates up to 200 Mbps using existing electrical network. A pair of these units can be used to form a working Local Area Network without extra cabling. Device makes use of extra bandwidth in electrical network. To form a working Local Area Network at least two units are required.

In addition, device also includes 802.11n Wlan Access Point.

Technical specifications

Features

- Works with any operating system
- Web based management
- Transfer rates up to 200 Mbps
- Modulations: 1027/256/64/16/8 QAM, QPSK, BPSK
- Security: 128-bit AES Encryption
- Ethernet standards: IEEE 802.3, IEEE 802.3u, IEEE 802.3x
- Electric input: 100-240 V AC, 50-60 MHz
- No separate PSU
- 802.11n Wlan Access Point
- 2 3dBi external antennas
- EAN number: 64 3001092 503 3
