

TW-EA510v3 (c)

TW-EA510 v3 (c) is an ADSL modem which can be used to establish working local area network. Modem includes 802.11b/g/n Wlan Access Point, four port switch and also a firewall. TW-EA510v3 (c) can also be used as a router with so called EWAN function, which can be found in the latest firmware version.

Technical specifications

Features

- Works with any operating system
- 802.11b/g Wlan Access Point
- Can act as a regular Wlan router with latest firmware version (EWAN)
- IPTV support
- DHCP server
- PPPoE & PPPoA support
- Works with dynamic and static IP Address
- Max. throughput: 24 Mbps downstream, 3,5 Mbps upstream
- Maximum reach is 5-7 km depending on the variables, i.e length of the copper pair
- Supported modes: Ansi T1.413 v2, G.DMT, G.992.2 (G.lite), ADSL, ADSL 2, ADSL 2+, Annex A, I, J, L & M
- Supported protocols: RFC2684 (previously known as RFC1483), PPPoA, PPPoE
- Co-Works with regular analogic phone (requires filter)
- Web based management
- System log
- 12 V DC 1 A PSU
- EAN code: 64 3001092 320 6
- Product package includes RJ45 Ethernet cable, RJ11 phone cable, filter, PSU and manual
- 4 10/100 Mbps Ethernet ports
- Firewall
- NAT/NAPT
- Security logs
- DNS relay
- DynDNS
- Virtual server and DMZ
- Supports RIP-1/2 and static routing
- SNTP support
