

## TW-EA904 FIRMWARE UPGRADE

- Newest firmware upgrade file can be found on our web page <http://www.telewell.fi/en/>. Save the file on your computer and unzip it.
- Switch the Ethernet cable to the port 1
- Open a web-browser and type in the Ip Address 192.168.0.254
- The user name and system password are admin and admin (as a default)
- Configuration -> System -> Firmware upgrade
  - o Restart device with factory default settings
  - o Click "browse" button to locate the image file

The screenshot shows a web interface for configuring a device. The main heading is "Configuration". Underneath, there is a section titled "Firmware Upgrade". The text in this section reads: "You may upgrade the system software on your network device. After upgrading, let your device restart with factory default settings or current settings." Below this text, there are two radio button options: "Factory Default Settings" (which is selected) and "Current Settings". There is also a text input field for "New Firmware Image" with a "Browse..." button next to it. At the bottom of the section, there are two buttons: "Upgrade" and "Cancel".

- o The update process takes about 3 minutes to complete and the router will restart
- o After restarting the router is ready to use
