

TW-LTE ROUTER: Firmware Upgrade

Note!

- Please make the firmware upgrade via Ethernet, not Wlan
 - After upgrading, you can not use the old config files
 - Please use Chrome browser
1. Download the right firmware file from https://telewell.fi/en/product/3g4glte-products/tw_lte_reititin_uusi/tw-lte4g3g-router
 2. The file is in zip mode, it needs to extract before upgrading
 3. After downloaded the right file, please sign in web management 192.168.0.254 (hallinta / saimaa) and go to Management / Upload firmware
 4. Choose "Upload firmware with default configuration"
 5. Click "browse" ja choose the right file
 6. Click "Apply" and the upgrading starts. Wait as long as upgrading is done
 7. After that the device is ready to use

Upload Firmware

It takes about 2 minutes to upload upgrade flash and be patient please. Caution! A corrupted image will hang up the system.
